[1] Includes 36,068 taxable returns, Form 1041, which correspond to taxable returns, Form 1040, for estates and trusts filed for prior years, and 8,463 taxable returns and 3,784 nontaxable returns for estates and trusts filed on Form 1040 which should have been filed on Form 1041.

[2] For general explanations, see pp. 1–6.

[3] Less than one-hundredth of 1 percent.

1938

Basic table 2–A, pages 92–101, shows data similar to those in the preceding table, but classified in greater detail. The returns with no alternative tax (Part II, pages 94–95) are shown separately from those with alternative tax (Part III, pages 96–101) and the returns with alternative tax are further classified into those with net long-term capital gain and with net long-term capital loss. In all parts of basic table 2–A there are presented six net income classes for returns with net income under $5,000.

The distribution of number of returns, net income or deficit, and tax, by States and Territories, is given in basic table 1–A, pages 80–81.

SIMPLE AND CUMULATIVE DISTRIBUTION BY NET INCOME CLASSES OF NUMBER OF RETURNS, NET INCOME, AND TAX

The distribution of individual returns with net income by a limited number of net income classes is exhibited in the following table. There are shown simple and cumulative totals and percentages for the number of returns, net income, and tax. Basic table 3–A, pages 105–107, contains number of returns, net income, and tax distributed by a more detailed net income classification. Both in the following table and basic table 3–A, aggregates are shown for the returns with no net income:

Individual returns [1] *with net income (excluding fiduciary returns), 1938, by net income classes: simple and cumulative distribution of number of returns, net income and tax, and percentages; also aggregate for individual returns with no net income (excluding fiduciary returns), 1938* [2]

Individual returns with no net income (taxable) [4]	615	(7)				
Grand total	726,735	(7)				

[1] Unlike text table on p. 8, Statistics of Income for 1937, Part 1, excludes taxable fiduciary returns with net income, Form 1041, and taxable and nontaxable returns for estates and trusts incorrectly filed on Form 1040 instead of Form 1041. Data for individual returns with no net income are included in this table for the first time. See basic table 3–A, pp. 105–107, for distribution of the data by more detailed net income classes.
[2] For general explanations, see pp. 1–6 and 14–15.
[3] See footnote 8, p. 11.
[4] Reported on 25 returns with net long-term capital loss on which the tax, computed on net income before the deduction of net long-term capital loss, exceeds 30 percent of the net long-term capital loss.
[5] Less than one-hundredth of 1 percent.
[6] Deficit.
[7] Percentage not computed.

Basic table 2–A, pages 92–100, shows information similar to that in the preceding table, but classified in greater detail. Returns with no alternative tax (Part II, pages 94–95) are shown separately from those with alternative tax (Part III, pages 96–100) and returns with alternative tax are further classified into those with net long-term capital gain and with net long-term capital loss, showing the computation of the alternative tax. In all parts of basic table 2–A there are presented six net income classes for returns with net income under $5,000.

The distribution of number of returns, net income or deficit, and tax, by States and Territories, is given in basic table 1–A, pages 80–81.

SIMPLE AND CUMULATIVE DISTRIBUTION BY NET INCOME CLASSES OF NUMBER OF RETURNS, NET INCOME, AND TAX

The distribution of individual returns with net income by a limited number of net income classes is exhibited in the following table. There are shown simple and cumulative totals and percentages for the number of returns, net income, and tax. Basic table 3–A, pages 104–106, contains number of returns, net income, and tax distributed by a more detailed net income classification. Both in the following table and basic table 3–A, aggregates are shown for the returns with no net income.

Individual returns with net income (excluding fiduciary returns), 1939, by net income classes:[14] *simple and cumulative distribution of number of returns, net income, tax, and percentages; also aggregate for individual returns with no net income (excluding fiduciary returns), 1939*

(For text defining certain items and describing methods of tabulating and estimating data, see pp. 2-6 and 12-13)

[Net income classes and money figures in thousands of dollars]

Net income classes	Returns					
	Simple distribution		Cumulative distribution from highest income class		Cumulative distribution from lowest income class

See text for individual returns for "Explanation of Classifications and Terms" and for "Description of Sample and Limitations of Data."

[1]Includes nontaxable returns with adjusted gross income exceeding the class limit.

[2]Less than 0.05 percent.

[3]Includes 50,991 returns with no information reported.

[4]Adjusted gross deficit.

[5]Adjusted gross income less adjusted gross deficit.
